Aroduction standard.

## Notes:

1. Metric to inch conversion-see page 68.
2. Basic part numbers shown above include code "SS" for AISI 440C stainless steel. If SAE 52100 chrome alloy steel is desired, delete "SS."
3. See page 63 for ABEC tolerances.
4. r=Maximum shaft or housing fillet radius that bearing corners will clear.
5. While we have the capability to produce the sizes listed, they are not all currently in production. Please consult with factory for minimum order quantity and quote.
6. Add "Z" for single shield, "ZZ" for two shields, as a suffix to basic part number before "Y" or "W" width variations.
$\dagger$ For flanged bearing, substitute prefix "SSLF-" when applicable.

* Please consult with factory for cage availability.
A Available only as flanged type.
$\diamond$ Inch conversions are given for reference only.
*     * Load ratings are based on ABMA Standard \#12.
